

A robust, full-platform hoist designed for larger wheelchairs where stability, simplicity, and reliability are critical.

The Hoist 4500 is designed for fleets that need a stable, full-platform hoist for larger wheelchairs and higher support requirements. Its solid perforated steel platform provides confidence during loading. The simplified design, with fewer moving parts, helps reduce maintenance complexity and improve long-term reliability.

The 4500 offers a dependable, low-risk solution. It's fully certified to New Zealand standards and is supported by a 3-year warranty with ongoing service and parts availability—helping reduce downtime and avoid unexpected aftercare issues.
