

A space-efficient, fully automated hoist built for safe, reliable wheelchair access in smaller vehicles.

The Hoist 4000 is built for mobility vehicle fit-outs that need a reliable, space-efficient solution without compromising safety or usability. Its double stacker arm and automated folding system make daily operation straightforward for staff, while the compact design ensures rear visibility and storage space are retained—critical in smaller vehicles.

The Hoist 4000 delivers a balanced, low-risk option. It's fully certified to New Zealand standards and is supported by a 3-year warranty with ongoing service and parts availability—helping reduce downtime and avoid unexpected aftercare issues.

Dimensions

Folded height: 1220mm
