

The mobility enhancement ramp 3000 is ideal for wheelchair and occupant loading.

The gas stay support system allows for safe, fast and easy use with a quick release lock. Its folding action enables the right length to load easily. The special perforated profile provides extra safety through its non-skid surface. Designed for heavy goods and constant high usage, it has been crash 20G certified, so you know its solid and durable. With a max load capacity of 400kg it will more than meet your requirements. The ramp 3000 is ideally fitted by an Auto Transform electrician.
