Step 250

The Step 250 is perfect solution for you and your vehicle if you require assistance getting in and out of a high vehicle

Sidestep 250 is a durable, manually operated system that has been well tested and tried for over 20 years in the passenger transport market. If the step up to your vehicle is too high Ð this is the perfect solution for you. It is made from fully galvanised commercial grade steel with a zinc coating to reduce rust and increases longevity of heavy use.

Maximum weight 150kg. It has a non-slip tread plate platform to reduce accidents getting in and out of the vehicle. Having an easy to use system with one release handle allows for easier loading and unloading.
