

The Step 250 is perfect solution for you and your vehicle if you require assistance getting in and out of a high vehicle

Sidestep 250 is a durable, manually operated system that has been well tested and tried for over 20 years in the passenger transport market. If the step up to your vehicle is too high then this is the perfect solution for you. It is made from fully galvanised commercial grade steel with a zinc coating to reduce rust and increases longevity of heavy use. It has a non-slip tread plate platform to reduce accidents getting in and out of the vehicle. Having an easy to use system with one release handle allows for easier loading and unloading.
