

Mobility Tracking is a great solution to make your mobility transport as flexible as possible.

Mobility Tracking is a great solution to make your mobility transport as flexible as possible. Suited to quick release legs on seats, quick release track mounted restraints systems and side fold seating. For a great professional finish, the aluminium airline tracking come with a vinyl or carpet covering. Its corrosion free installation system increases the flexibility of long term use and longevity. The tracking system allows for maximum capacity to suit your application and get the best return for your transport. Our mobility tracking system is fully certified to New Zealand Safety standards for your assurance.
