

Design your vehicle layout to suit all your needs.

We have developed our own floor system for safe, efficient and flexible passenger, commercial or mobility fitouts. It's a fully bonded system that can be installed without drilling holes in the vehicle. The robust aluminium profile and full-length tracking rails support a range of configurations. Once installed, the floor can be covered with carpet or vinyl.

FEATURES

- Professional look and feel enhancing passenger travel experience
- More flexibility in configurations
- Better sale-able value of vehicle
- Fully adjustable seat positioning
