

Flexible storage that keeps small parts organised and easy to take where you need them.

Modular briefcase-style toolboxes are designed to work seamlessly within your drawer unit setup, giving you a simple way to organise smaller parts, fittings, and components. Instead of loose items shifting around, everything stays contained, visible, and easy to find.

Setup the toolbox with lightweight internal dividers or plastic small parts trays. Each box can be quickly removed and taken onto the job site, so your team has what they need on hand without going back and forth. As part of a complete vehicle storage system, they add another layer of organisation that helps keep jobs running efficiently.

Dimensions (mm)

- 66(H) x width/depth to match drawer unit
- 100(H) x width/depth to match drawer unit
