

A tough, simple and practical tow bar option.

When it comes to preventing injuries and mishaps around the tow bar or hitch, the Safe-T-Step hitch step or tow bar step is the safest, toughest and simplest solution you will ever find. It allows you to get up and down from your vehicle safely, providing more access at a better height. While other steps require you to remove the whole hitch, the Safe-T-Step simply flips down over the existing tow ball. It never needs to be removed. Do your shins a favour with this safe, tough and simple hitch step. You won't believe how easy it is to install.

FEATURES

- Tough
