Double fold-away seat

A versatile seating solution

The double fold away seat carries two passengers when in use and folds compactly when you need the floor space. The complete side-folding system tucks the entire unit out of the way to make room for a wheelchair, equipment, or larger cargo. Adjustable backrests recline or lock upright for comfort on longer trips, and folding armrests give passengers easy access in and out. A practical addition to any flexible mobility or passenger fit-out.
Note: This seat is suitable for a 9+ seat build
